Introduction to NAICS

The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

NAICS was developed under the auspices of the Office of Management and Budget (OMB), and adopted in 1997 to replace the Standard Industrial Classification (SIC) system. It was developed jointly by the U.S. Economic Classification Policy Committee (ECPC), Statistics Canada, and Mexico's Instituto Nacional de Estadistica y Geografia, to allow for a high level of comparability in business statistics among the North American countries.

This official U.S. Government Web site provides the latest information on plans for NAICS revisions, as well as access to various NAICS reference files and tools. Additional information on the background and development of NAICS is available in the History section of this Web site.

Capability Statement

Your Logo Here

TargetGov Tip: This is a content &design template. Show your logo and contact information, with a specific person's name, phone and email

Core Competencies:

Tailor your Capability Statement to reflect your audience. An example first sentence is, "[Your Company] is able to help the [Target Agency or Prime Contractor] in their requirement for [specific requirements].

Short introduction statement relating the Company's core competencies to the agency's specific needs follow by keyword heavy bullet points.

TargetGov Tips:

- No Long paragraphs
- Use short sentences followed by keyword heavy bullet points
- Create a new document for each agency mission or specific opportunity
- Call this document a Capability Statement
- Preferably, this Capability Statement is one page, one side
- Go to two sides only if absolutely necessary
- Save and distribute as a PDF, not a Word, PowerPoint or other format

Differentiators:

Identify what makes you different from your competitors and how this benefits the targeted agency.

TargetGov Tip: Relate your key differentiators to the needs of the agency, prime or teaming partner.

A differentiator should be a **clear value statement** detailing what makes your company different from its competitors *relating to the upcoming opportunities*

Sample Differentiator Questions

- Why did your biggest customer want you?
- How and why is your company the best choice for the needs of this opportunity or agency?
- What is it about your services/products that make you stand out from the rest?

Past Performance:

List past customers for whom you have done similar work. Prioritize by related agency, to all federal to other governments to commercial contracts. If the past projects do not relate to the targeted agency's needs, do not list

Formatting:
Name of the Agency, Department, or Company. Contract # (if applicable). Value. Timeframe. Brief description of the work done. *Include metrics or customer benefits.* End with Contract: Name, Position/Title, Email, Phone

TargetGov Tip: Ideally, include specific contact information for immediate references. Include name, title, email, and phone.

Company Data:

One very brief paragraph of company description detailing pertinent facts.
TargetGov Tip: Readers will visit your website for additional information. Make sure your website is constantly updated and government-focused.

List specific Codes:

- Socio-economic certifications: 8(a), HUB Zone, SDVOB, etc.
- DUNS
- NAICS (all)
- CAGE Code
- Accept Credit and Purchase Cards
- GSA Schedule Contract Number(s)
- Other federal Contract vehicles
- BPAs and other federal contract numbers
- State and other contract numbers
