BARDA’s Role in Medical Countermeasure Development

Richard J. Hatchett, MD
Director (Acting), HHS/BARDA
Deputy Assistant Secretary (Acting), HHS/ASPR

8 June 2016
Support advanced development of and make available medical countermeasures for CBRN threats, pandemic influenza, emerging infectious diseases, and antibiotic-resistant bacteria by transitioning candidates from early development across the "Valley of Death" to regulatory approval.
Support the advanced development of medical countermeasures for CBRN, pandemic influenza, and emerging infectious disease threats.
Challenges

• Medical countermeasures aren’t like other investments in military capability

• We can’t predict what we need to prepare for

• Governments typically react to rather than prepare for infectious disease threats

• Sustainability
Looking Ahead

• Sustainable preparedness for established threats

• Unparalleled capacity to respond to emergent threats

• Programs that drive innovation in products, platforms, and enabling technology

• Partnerships of global reach and unprecedented efficiency
