Information within this report is subject to the data and transaction integrity of the Federal Procurement Data System (FPDS). Multiple entries for the same company likely result from changes and/or modifications to contracts during the period of performance. Negative value entries normally reflect work remaining to be performed, work in progress or modifications requested by the government and/or the vendor for unnecessary or delayed work. Negative values may also result from de-obligation of funds due to performance, non-performance or other contract actions, potentially during a previous fiscal year (resulting in negative values for the current fiscal year). While a single contractor may have a negative value, the county may be positive overall, due to contract actions with other contractors. Conversely, while a county may have an overall negative value due to a high negative by even a single contractor, many of the contractors within the county may have had positive contract revenues.
